

NEO S-Series Family

Automated tape libraries offer effortless backup and archive capabilities

In a world where the amount of corporate data generated doubles every 18 months and companies are legally bound to store the data long-term, IT managers are forced with the challenge of how to backup and archive data more efficiently and more affordably. Enter Overland Storage – where we recognize the need for your business to do more with less, and help address your small-to-medium sized business storage needs with the NEOs family of tape library solutions. Designed for IT offices with limited space, limited resources and limited budgets, the NEOs family delivers the ultimate in simple, affordable, reliable backup, archive and disaster recovery.

Capabilities

Remote Management

- Manage your NEO library from anywhere – all you need is a web browser and a network connection
- The simple, intuitive interface makes administration easy
- Set alerts for backup and archive events

Encryption

- Prevents unauthorized access to data
- Provides ability to securely transport cartridges offsite
- Facilitates data retention for regulatory compliance

Removable Cartridge Magazines

- Secure, convenient media handling
- Effortless off-site transportation of cartridges for disaster recovery planning
- Reduces administrative costs

LTFS

- Easy drag & drop functionality
- Familiar directory tree interface
- Eliminates the need for backup software

In a study conducted by the University of California Santa Cruz, it was determined that 90% of data stored on disk was never accessed again and that another 6.5% of the data was only accessed once. Because disk is an expensive place to store massive amounts of infrequently accessed data, best practices recommend archiving data off to tape, usually within a 30 day period after the data has been created. Moving the data to a NEO S-Series library reduces backup storage requirements, reduces costs, improves use of valuable floor space, improves energy efficiency, provides a higher level of data security and improves performance of networks and disk-based backup systems. NEO S-Series tape libraries provide the capacities, features and efficiencies needed for archived data.

Simple

Managing backups and archives can be a complex and costly activity. That's why NEOs is focused on providing a simple solution that reduces your administrative costs for backup and archive. Web-based remote management provides easy and convenient administration of the data archive process from anywhere in the world. Removable cartridge magazines enable easy access to data, reduce media handling costs and facilitate offline storage of your data for disaster recovery purposes. Standard barcode readers reduce media inventory times and simplify media management. Mail slots deliver easy, secure access to individual tape cartridges without interrupting library operations. NEO 200s and NEO 400s tape drives are easily added, removed or replaced, providing the flexibility to adapt to changing data storage requirements. Combine the NEOs ease-of-use features with its effortless configuration and installation and you will be backing up and archiving data in no time at all.

Affordable

NEOs doesn't just deliver an affordable purchase price - it also provides long-term cost of ownership advantages. NEOs ease-of-use features mean you spend less time managing your backup and archive, reducing your administrative costs. Because NEOs is an extremely reliable platform, service and maintenance costs are reduced and the costs associated with downtime and lost productivity are eliminated. Effortless upgradeability to next-generation technologies protect your investment long-term while allowing you to increase your storage capacities and transfer rates in order to keep up with the ever-increasing demand to store more and more data. NEOs not only protects your data but also protects your storage budget.

Compact

Available in rack-friendly 1u, 2u and 4u form factors, NEOs packs up to 75TB of data into a single unit of rack height. The ability to store so much data in such a small space minimizes the use of valuable rack space and reduces your overall cost of ownership.

Versatile

Providing up to 300TB of data storage capacity, NEOs tape library solutions are not only designed to meet your data backup and archive needs today but allow you to grow in to, not out of, your storage. Available with SAS or Fibre Channel connectivity, NEOs easily integrates into your existing network infrastructure and provides easy-of-compatibility with 3rd party backup software applications. Utilizing industry-leading LTO tape drives, NEOs combines high-capacity storage with high-performance data transfer rates and increased backup and archive efficiency. Native partitioning capability in NEO 200s and NEO 400s libraries provides the ability to carve a single physical library into smaller logical libraries and securely use your NEOs library for a variety of different storage applications. NEOs libraries are the perfect solution for today's constantly-changing IT environment.

Specifications

	 NEO 100s	 NEO 200s	 NEO 400s
Configuration (total #)	cartridge slots 9 magazines 1 mailslots 1 tape drives 1	cartridge slots 24 magazines 2 mailslots 1 tape drives 1-2	cartridge slots 48 magazines 4 mailslots 3 tape drives 1-4
Tape Drives Supported	LTO-6, LTO-5, LTO-4	LTO-6, LTO-5, LTO-4	LTO-6, LTO-5, LTO-4
Capacity (max)	uncompressed LTO-6: 22.5TB LTO-5: 13.5TB LTO-4: 7.2TB compressed LTO-6: 56.3TB LTO-5: 27TB LTO-4: 14.4TB	uncompressed LTO-6: 60TB LTO-5: 36TB LTO-4: 19.2TB compressed LTO-6: 150TB LTO-5: 72TB LTO-4: 38.4TB	uncompressed LTO-6: 120TB LTO-5: 72TB LTO-4: 38.4TB compressed LTO-6: 300TB LTO-5: 144TB LTO-4: 76.8TB
